

Monopoly GO Free Dice Guide (2026)

Version: 2.0 (Official Update) | Date: February 2026

1. Introduction

Monopoly GO has become a global phenomenon, combining the classic board game with mobile strategy and social mechanics. The primary resource for progression is **Dice Rolls**. Without dice, you cannot move, earn money, build landmarks, or complete events.

This guide provides a comprehensive overview of legitimate methods to acquire free dice. Unlike unauthorized "hacks" or "generators" which violate the Terms of Service and risk account bans, the strategies outlined here focus on in-game mechanics, official promotions, and smart resource management.

Warning: Avoid any website claiming to offer "unlimited dice generators." These are scams designed to steal personal information or install malware. Only trust links from official Monopoly GO sources.

2. Official Daily Dice Links

The most reliable source of free dice is the daily reward links released by the developer, Scopely. These links are typically distributed through official social media channels such as Facebook, Instagram, and Discord.

How to Claim Daily Links:

- **Source Verification:** Ensure the link directs to `mply.io` or an official condensed URL.
- **Frequency:** Links are usually posted 1-2 times daily, offering between 25 and 30 dice each. Occasionally special events offer more.
- **Expiration:** Most links expire within 2-3 days. It is crucial to check legitimate aggregator sites or official pages daily.

Legitimate aggregator websites (fan sites) compile these links into a single list. Always verify the domain reputation before clicking.

3. Events and Tournaments

Events are the primary method for earning substantial amounts of dice. Understanding the event types is key to maximizing returns.

Top Events (Banner Events)

These typically last 2-4 days and require collecting specific tokens on the board. Milestone rewards often include hundreds or thousands of dice.

Pro Tip: Only play heavily when a "High Roller" boost is active or when you are close to a significant milestone. Avoid draining your dice for small cash rewards.

Tournaments

Tournaments are competitive leaderboards that reset daily usually around 1 PM or 2 PM ET. Rewards include dice, cash, and sticker packs.

- **Placement Strategy:** Sometimes it is better to start a tournament late (e.g., 2-3 hours before it ends) to be placed in a less competitive bracket ("snipe" strategy).
- **Milestones:** Focus on hitting the milestone rewards rather than just the top placement, as placement rewards are granted only once at the end.

4. Sticker Albums and Milestones

Completing sticker albums yields massive rewards, often 10,000 to 20,000 dice for the final album.

- **Trading:** Join authentic trading communities on Facebook or Discord. Be wary of scammers; use the "Exchange" feature introduced in late 2023 to safely swap cards.
- **Golden Blitz:** During these limited-time events, you can trade specific Gold cards, which are normally untradeable.
- **Safe Vaults:** Save your duplicate stars for the highest tier vault (e.g., 800 or 1000 stars). This guarantees a "Wild Card" or a Galaxy Pack with a guaranteed new card.

5. Tips for Maximizing Dice Usage

Strategic rolling is better than auto-rolling.

- **The 6-7-8 Rule:** Statistically, 7 is the most common roll with two dice. Increase your multiplier when you are 6, 7, or 8 spaces away from a target (Railroad, Chance, or Event Tile).
- **Shield Management:** Always keep your shields full. Being attacked while shielded often grants dice returns or prevents loss of progress. If your shields are full, additional shield tiles convert to extra dice rolls.
- **Regeneration:** Dice regenerate at a rate of roughly 8-10 per hour up to a cap (usually 80-100). Always try to be below your cap before sleeping to gain "natural" dice overnight.

6. Frequently Asked Questions

Can I get banned for using daily links?

No. Daily links are provided by the developers themselves. They are official promotional tools.

Does the "Airplane Mode" glitch work?

While historically popular, developers actively patch exploits like the Airplane Mode glitch (rerolling by disconnecting internet). Relying on this is risky and can lead to account suspension or sync errors. We recommend playing legitimately.

How do I invite friends for dice?

You can invite friends via your unique invite link. When a new player (who has never installed the game) joins and links their Facebook account, you receive a dice bonus. This is capped at a certain number of friends (usually 10 or 100 depending on the "bar" filling).

7. Updates and Official Resources

Stay updated with the latest game changes.
